HTML Day 2

Lists, Links, and Image Management

Today's Roadmap

Mastering the core elements of information organization and navigation.

ORGANIZING WITH LISTS

The Shopping List Analogy

Think of a grocery trip. You don't write a paragraph about what you need; you list items line by line for clarity.

- Milk
- Bread
- Eggs

LIST TYPES AND SYNTAX

Unordered

Used for collections where order doesn't matter. Uses the tag and displays bullet points.

Ordered

Used for sequential steps or rankings. Uses the tag and displays numbers.

List Item

Every single entry inside a list must be wrapped in the tag to be rendered correctly.

UNORDERED LISTS (UL)

Code Implementation

Perfect for skills or itemized features:

```
Python
JavaScript
React
```

Browser View

- Python
- JavaScript
- React

ORDERED LISTS (OL)

Browser View

Sequential recipe steps:

1. Learn HTML Basics
2. Style with CSS
3. Add JS Logic
4. Build Projects

The Recipe Analogy

Just like steps in a cookbook, ordered lists imply a specific sequence where the order is vital to the final result.

```
...
```

NAVIGATION AND LINKS

The City Map Analogy

Imagine a city map where roads connect one district to another. Links (Hyperlinks) perform the same function for the internet, connecting isolated pages into a web.

Without links, every website would be an island.

THE ANCHOR TAG ANATOMY

The Tag

The "a" stands for anchor. It creates a clickable point on the page.

href Attribute

Short for "hypertext reference". This is the destination URL or file path.

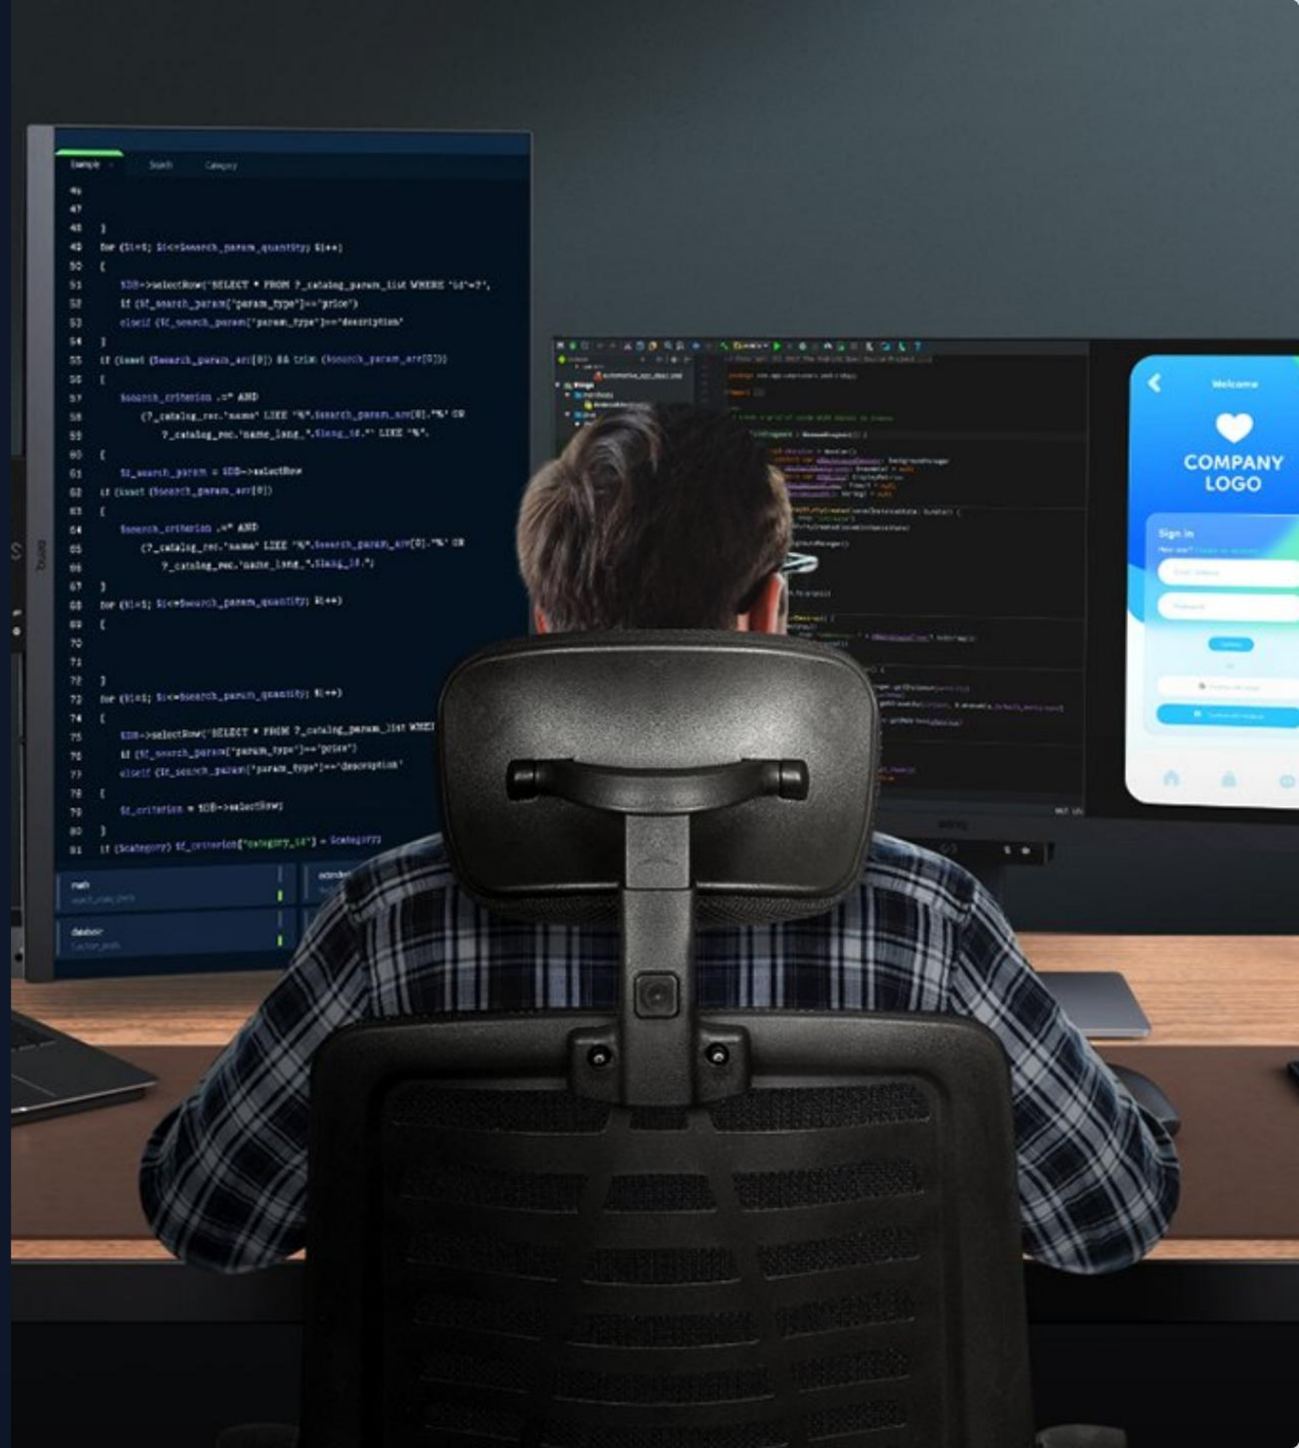
Label Text

The text between the tags is what the user actually sees and clicks.

```
Go to Google
```

VISUAL ENGAGEMENT

Reading a news article without photos is dull. Images provide context, break up text density, and make content engaging.



ESSENTIAL IMAGE ATTRIBUTES

Attribute	Description	Why it matters
`src`	Source: The file path or URL	Tells browser where the file lives.
`alt`	Alternative text description	Accessibility (screen readers) and SEO.
`width`	Resizing the image	Ensures the layout remains consistent.

MODULE 2 PRACTICE TASKS

Skills Page

Create a showing 5 major developer skills (HTML, CSS, JS, etc.)

Steps Page

Make an listing your steps to landing a dev job.

Add Media

Insert an image and link it to your GitHub profile using .

YOUR 4-HOUR SUCCESS PLAN

Hour 1

Master Lists (ul/ol)

Hour 2

Navigation & Links

Hour 3

Images & Attributes

Hour 4

Combine Everything

Thinking Question:

Why do websites use lists instead of paragraphs for navigation menus?
